

Job Advertisement

The following is a job advertisement that you are free to use when writing your CV. However, you alternatively might choose to use a real job advertisement. If so, make sure to include the text of it when you submit your CV. Please do not submit a URL, as those sometimes expire before we have a chance to see the advertisement.

Design Engineer Consultants

DEC is an international consultancy firm involved in collaborative engineering projects. Integrity, dependability and innovation are the driving forces that have kept DEC at the cutting edge of research and development within various fields of engineering. DEC is a young and internationally focused company offering a dynamic and creative working environment. Qualified individuals are invited to apply for positions within the following areas:

Wireless Networking Software Development
Environmental Systems
Computer Integrated Manufacturing Design
Circuit Analysis and Development

Qualifications required

- University degree in Engineering
- Good knowledge of data and communication systems
- Ability to offer creative design solutions
- Ability to advise on innovation initiatives
- Good communication skills including fluent written and spoken English

Role/Responsibilities

You will be part of a team involved in designing services in a variety of project types, from preliminary scheme outline stage through to the preparation of detailed calculations and design, to project handover. You will be expected to establish the design concepts with the team and produce concept/feasibility reports.
