

Student representatives meeting 2

Time: 15:15, 14/10/2021

Secretary: Artur Leitão

Present

Ana Bove, Thierry Coquand, Johan Atterfors, ?Viktor Fredholm ?, Sanna Persson, Artur Marecos Mendes Leitao, Benjamin Sannholm, Filip Antonijevic, Deeksha Gautam

Comments and Response

Student: People like being in classes in person and that the blackboard is used.

Student: Assignments are difficult and the examples in the exercise classes are easier and are not very helpful to be able to solve the assignments.

Professors: The exercises are solved in class after the deadlines so the students try to solve them by themselves.

Student: Comment about the last exercise of Assign5 being a bit "unnatural" in the way that if the some student didn't get the "hints" then he wouldn't be able to understand it.

Professors: The goal of the exercise was to show the "expressiveness" of FOL, in the way that you can encode really hard problems with it.

Student: Would like more examples in the lectures.

Professor: The zoom lectures make it difficult to give more examples and in the hybrid lectures it is not that easy to use the board because of the students online.

Student: Temporal logic is presented a bit to fast.

Student: Some students have seen it before in other courses, concurrent programming for example.

Professors: Agreed that it is a bit fast but it is an important subject and a lot of the students have seen it before. There are extra reading material in the course page.

Student: Asked for recommendations on more exercises.

Professors: The book and the internet have plenty of exercises. There are proof checkers online also.
