Project Ideas for DAT257

The focus is on practising Git and Agile Workflow, not to invent a spaceship.

Hans-Martin Heyn, Universitetslektor, 2023

Background: The 17 Sustainable Development Goals of the United Nations

- Adopted by all UN Member states in 2015
- "Shared blueprint for peace and prosperity"
- Process started in 1992 at the Earth Summit in Rio de Janeiro
- Includes 169 targets
 - The aim is to achieve most of these targets by 2030!!

1 NO POVERTY

END POVERTY IN ALL ITS FORMS EVERYWHERE

- Poverty is defined as income less than 1.25 USD / day
 - Sweden has an average income of ~104 USD/ day!
- Targets include:
 - Poor people are not vulnerable to climate change
 - Equal rights to economic resources
 - Sustainable jobs and job equality
 - Eradicate extreme poverty by 2030

2 ZERO HUNGER

END HUNGER, ACHIEVE FOOD SECURITY AND IMPROVED NUTRITION AND PROMOTE SUSTAINABLE AGRICULTURE

- Mostly women and children suffer from hunger and malnutrition
- Targets include:
 - Eradication of all hunger and malnutrition in the world
 - Protecting small farmers
 - Protecting genetic diversity in crops
 - Research to make farming more productive
 - Reduce drastically waste of food

ENSURE HEALTHY LIVES AND PROMOTE WELL-BEING FOR ALL AT ALL AGES

- Promoting well-being for all ages
- Targets include:
 - Universal health coverage
 - Increasing healthcare workforce
 - Reducing illness and death by pollution
 - Tackling a wide range of global health challenges such as AIDS, Malaria, Tuberculosis
 - Promote vaccinations

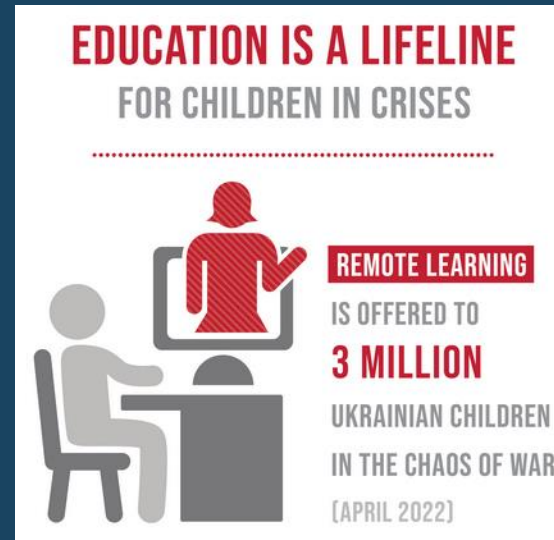

4 QUALITY
EDUCATION

ENSURE INCLUSIVE AND EQUITABLE QUALITY EDUCATION AND PROMOTE LIFELONG LEARNING OPPORTUNITIES FOR ALL

- Obtaining quality education for everyone, independent of their financial or social status
- Targets include:
 - Access to university
 - Vocational (on-the-job) trainings
 - Promote entrepreneurial skills
 - Help children to read

5 GENDER
EQUALITY

ACHIEVE GENDER EQUALITY AND EMPOWER ALL WOMEN AND GIRLS

- Gender equality is a necessary foundation for a peaceful, prosperous and sustainable world.
- Targets include:
 - Freedom from discrimination and violence
 - Equal share of leadership opportunities
 - Equal share in property ownerships
 - Eliminate sexist language and behaviour

6 CLEAN WATER
AND SANITATION

ENSURE AVAILABILITY AND SUSTAINABLE MANAGEMENT OF WATER AND SANITATION FOR ALL

- Clean, accessible water for all
 - 40% of world population has not access to clean water!!
- Targets include:
 - Access to basic technologies like toilets
 - Protecting ecosystems that provide water
 - Reduce waste of water

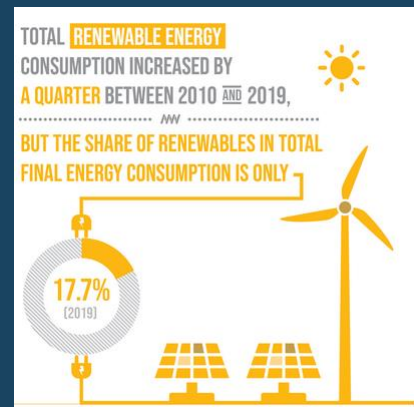

7 AFFORDABLE AND
CLEAN ENERGY

ENSURE ACCESS TO AFFORDABLE, RELIABLE, SUSTAINABLE AND MODERN ENERGY FOR ALL

- Energy is a central and major challenge, but also opportunity towards a sustainable world
 - 1.3 billion people around the world have currently no access to (reliable) electricity.
- Targets include:
 - Conversion to renewable energy sources
 - Dramatic improvement in energy efficiency

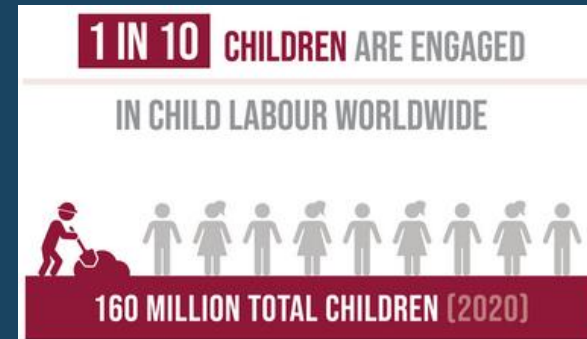

8 DECENT WORK AND
ECONOMIC GROWTH

PROMOTE SUSTAINED, INCLUSIVE AND SUSTAINABLE ECONOMIC GROWTH, FULL AND PRODUCTIVE EMPLOYMENT AND DECENT WORK FOR ALL

- Sustainable economic growth will require working conditions that allow people to have quality jobs
- Economic growth must not rely on ecosystem degradation.
- Targets include:
 - Reduce unemployment
 - Eliminate child labour
 - Achieve more productivity through diversification
 - Full and productive employment and equal pay independent of sex and health status

9 INDUSTRY, INNOVATION
AND INFRASTRUCTURE

BUILD RESILIENT INFRASTRUCTURE, PROMOTE INCLUSIVE AND SUSTAINABLE INDUSTRIALIZATION AND FOSTER INNOVATION

- Infrastructure and sustainable industrial development is crucial to achieve sustainable development
- Targets include:
 - Fostering more innovative and environmentally sound approach to industrial development
 - New ways to repurpose old material (Circular Economy)
 - Increase access to information and communications technology in least developed countries

HIGHER-TECHNOLOGY INDUSTRIES ARE FAR MORE RESILIENT IN CRISES THAN THEIR LOWER-TECH COUNTERPARTS

REDUCE INEQUALITY WITHIN AND AMONG COUNTRIES

- The world is massively unequal!
- More attention is needed to include disadvantaged and marginalised populations.
- Targets include:
 - Income growth of the bottom 40% of the population at a higher rate than the national average
 - Improve the regulation and monitoring of global financial markets
 - Facilitate safe, fair, regular and responsible migration and mobility of people

11 SUSTAINABLE CITIES
AND COMMUNITIES

MAKE CITIES AND HUMAN SETTLEMENTS INCLUSIVE, SAFE, RESILIENT AND SUSTAINABLE

- Cities need to provide opportunities for all
 - More than half of the world population lives in cities.
- Targets include:
 - Establish sustainable transportation
 - Disaster preparedness
 - Preservation of cultural and natural heritage
 - Keep city air clean

ENSURE SUSTAINABLE CONSUMPTION AND PRODUCTION PATTERNS

- Reduce waste and improve sustainable consumption
 - Majority of electronic waste is not being safely or sustainably recycled / handled.
- Targets include:
 - Halve per capita global food waste at retail and consumer level
 - Environmentally sound management of chemicals and all waste throughout their life cycle
 - Reduce waste generation

13 CLIMATE
ACTION

TAKE URGENT ACTION TO COMBAT CLIMATE CHANGE AND ITS IMPACTS

- Climate change affects everyone, everywhere!
 - Limit global warming to max. 2 degrees C.
- Targets include:
 - Integrate climate change measures into national policies and planning
 - Improve education and awareness of climate change and its consequences
 - Strengthen resilience and adaptive capacity to climate-related hazards and natural disasters in all countries

**RIISING GLOBAL TEMPERATURES
CONTINUE UNABATED, LEADING
TO MORE EXTREME WEATHER**

CONSERVE AND SUSTAINABLY USE THE OCEANS, SEA AND MARINE RESOURCES FOR SUSTAINABLE DEVELOPMENT

- World's oceans are overfished, under-protected and stressed from climate change
- Targets include:
 - Research and learning about what lies beneath the oceans
 - Reduction of plastic waste ending up in the oceans
 - Prevent marine pollution of all kinds
 - Prohibit certain forms of fisheries subsidies which contribute to overcapacity and overfishing.

PROTECT, RESTORE AND PROMOTE SUSTAINABLE USE OF TERRESTRIAL ECOSYSTEMS, SUSTAINABLY MANAGE FORESTS, COMBAT DESERTIFICATION, AND HALT AND REVERSE LAND DEGRADATION AND HALT BIODIVERSITY LOSS

- Sustainably manage forests, combat desertification, stop land degradation, and halt biodiversity loss.
- Targets include:
 - Restoration of freshwater ecosystems
 - Sustainable forest management
 - Restore degraded land and soil, prevent desertification
 - Protect biodiversity

PROMOTE PEACEFUL AND INCLUSIVE SOCIETIES FOR SUSTAINABLE DEVELOPMENT, PROVIDE ACCESS TO JUSTICE FOR ALL AND BUILD EFFECTIVE, ACCOUNTABLE AND INCLUSIVE INSTITUTIONS AT ALL LEVELS

- Access to justice for all through effective, accountable, and fair institutions at all levels
- Targets include:
 - Reduction of violence
 - Total end of torture
 - Reduction of corruption
 - Institutions and governments that work for everyone

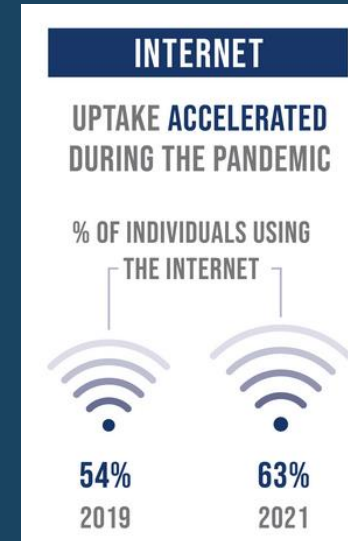

17 PARTNERSHIPS
FOR THE GOALS

STRENGTHEN THE MEANS OF IMPLEMENTATION AND REVITALIZE THE GLOBAL PARTNERSHIP FOR SUSTAINABLE DEVELOPMENT

- Every country and every sector has a role to play in achieving the SDGs.
- Targets include:
 - International support for developing countries
 - Assist developing countries in attaining long-term debt sustainability
 - Promote the development, transfer, dissemination and diffusion of environmentally sound technologies to developing countries on favourable terms.

What can we do in our project to promote or align with the SDGs?

11 SUSTAINABLE CITIES
AND COMMUNITIES

**MAKE CITIES AND HUMAN SETTLEMENTS INCLUSIVE,
SAFE, RESILIENT AND SUSTAINABLE**

- Sustainable Transport in Göteborg Region:
- <https://developer.vasttrafik.se/portal//#/>

9 INDUSTRY, INNOVATION
AND INFRASTRUCTURE

**BUILD RESILIENT INFRASTRUCTURE, PROMOTE INCLUSIVE AND
SUSTAINABLE INDUSTRIALIZATION AND FOSTER INNOVATION**

- Sustainable Transport in Sweden (Road, Rail, etc.): Trafikverkets API
- <https://api.trafikinfo.trafikverket.se/>

What can we do in our project to promote or align with the SDGs?

- Energy Consumption in Sweden
- <https://www.energimyndigheten.se/statistik/>
- European Electricity Production and Market
- <https://transparency.entsoe.eu/>

What can we do in our project to promote or align with the SDGs?

- Food statistics in Sweden
- <https://www.scb.se/hitta-statistik/statistik-efter-amne/jord-och-skogsbruk-fiske/amnesovergripande-statistik/livsmedelsstatistik/>
- Swedish Food Agency:
- <https://www.livsmedelsverket.se/>

What can we do in our project to promote or align with the SDGs?

- European spatial data
- <https://inspire-geoportal.ec.europa.eu/#>
- Forest Monitoring
- <https://www.globalforestwatch.org/>

What can we do in our project to promote or align with the SDGs?

- Environmental data from Swedish Environmental Agency
- <https://www.naturvardsverket.se/verktyg-och-tjanster/data-databaser-och-sokregister/oppna-data-fran-naturvardsverket/>
- Environmental data from European Environmental Agency
- <https://www.eea.europa.eu/data-and-maps>

What do we expect in the project?

- No perfect product is expected in the end!
- **Instead: Focus on how you develop your product.**
- By now you should have found a team, drafted a social contract, and created an empty git repository.

Phase 1 of Project: Find a scope

The initial project phase

- Step 1: Setup a Team
- Step 2: Create a Git account
- **Step 3: Define a project (more next week)**

How to find a good scope

- Don't make it too complicated.
- Start with an easy idea, and extend it gradually over the period of 6 weeks.
 - Align it with the UN SDGs. How does your idea fit to any of the targets? Be creative!
- Try out different APIs and project ideas, select the most “fun” and easy to use.
- **Keep in mind, you must be able to produce a running prototype within one sprint (i.e., one week), even if it is only a very (very) simple first product.**

Project Scope Deliverable

Project Scope

Published

Edit

Please submit the initial version of your project scope here. You can either submit a URL to the file in your repository (make sure it's publicly accessible) or a PDF. You can also copy and paste your social contract here as a text entry.

This assignment must contain a description of your project scope using a model canvas or visual / textual mockup. This deliverable consists of two parts:

1. Upload a description, the business model canvas or a mockup, i.e., a visual or textual representation of what you imagine your product / software shall look like, to your repository and here as .pdf;
2. Describe in the .pdf file in 200-500 words how your project aligns to one of the UN Sustainability Goals. Feel free to refer to any of the (sub) targets.
3. **Create a post in the discussion forum that contains the description of your project scope.** The description **does not have to include** a differentiating factor compared to already posted descriptions (i.e. two teams can develop applications based on the same idea). This is a change from previous years.

+ Rubric

An example from last year

- A new way for companies to collect information from their employees allowing individuals to record their well-being and analyze as well as reflect on it in a chosen period.
- The project started as only creating the interface of the application. New features were then added for each sprint.

PROMOTE SUSTAINED, INCLUSIVE AND SUSTAINABLE ECONOMIC GROWTH,
FULL AND PRODUCTIVE EMPLOYMENT AND DECENT WORK FOR ALL

Select a product owner (PO)

- The product owner can be part of the development team.
 - You can rotate after each sprint if you want.
- The PO ensures that the product is developed according to the “customers” expectations.
- Obviously we do not have a customer, so you (as PO) have to “interpolate” the customer’s expectations.
 - Define expectations: What does the (imaginary) customer expect? What are the initial expectations?
- The TA assigned to your team will mimic a customer from time to time and request changes or ask why you made certain design decisions. Be prepared for that.

Phase 2 of Project: Development

The development phase

- Step 4: for sprint $n=1 \dots 6$
 - Step 4a: Quickly develop something working
 - Step 4b: Test it
 - Step 4c: Refine the idea, add new features

Working in Sprints 1/2

- The product shall after each sprint be in a working order
 - After each sprint, the customer could request to “launch” the product into the market.
- Have a sprint planning before each sprint. Define goals/stories for your Kanban board.
- When you run out of goals/stories, have another planning meeting and create more.
- At the end of each sprint, the product owner (and/or your TA) defines new ideas / goals for your product.

Working in Sprints 2/2

- In each sprint, I want you to take (at least) 2 screenshots of your Kanban board: Just after sprint planning, and in the middle of the sprint.
- Feel free to take more (e.g., every time you work on the project)
- Make use of GitHub / GitLab if you like, e.g., use branching and integrated Kanban board.
 - Describe the use of GitHub / GitLab in your report.

Reporting the sprints (every week!)

Team Reflection Sprint1

✓ Published

Edit

⋮

Please submit your team reflection for Sprint 1 here as a text file in .txt or .md format, or a PDF.

You shall reflect on the following aspects:

- How is your team work? Does it work well? Can you improve?
- How do you ensure that your software is of good quality? Any measures you have taken (e.g., pair programming / checking, test procedures, etc?)
- What features did you implement in this sprint?
- What are your plans for the upcoming sprint?

The report shall be not longer than 1 page.

The report shall contain screenshots (minimum 2) of your Kanban board before and in the middle of the sprint.

Submitting a text entry box or a file upload

File types pdf, txt, and md

Due	For	Available from	Until
14 Apr at 17:00	Everyone	-	-

+ Rubric

Phase 3 of Project: Wrap-Up

The wrap-up phase

- Step 5: Create a presentation video
- Step 6: Write a report
- Step 7: Do peer-assessment individually

The video presentation

Video Uploaded

Published
Edit

Upload here a video that describes your project idea and outcome.

The video shall 3-5 minutes long. It shall contain

- A pitch of your idea,
- A timelapse of all Kanban screenshots,
- A presentation of the final product / software.

Points 0

Submitting a website url, a media recording, or a file upload

Due	For	Available from	Until
22 May at 10:00	Everyone	-	-

+ Rubric

- The video will be published on Canvas for everyone to see (as part of the discussion thread you created in the beginning)
 - It shall be between 3-5 minutes long.
- Pitch your idea (elevator pitch)
- Timelapse of the Kanban screenshots from all sprints
- A brief final presentation / walk-through of your final product.

The final report

Final Report

Published

Edit

Please submit your final report for the overall course here. The final report is a reflection by the entire team that encompasses what you did, your goals for the next such project, and how you achieve this goal. You can submit a text file in .txt or .md format, or a PDF.

As a team you should reflect on the topics discussed in the lecture (i.e., how to work as a team, Scrum and Software Quality, Building a Product).

The report should summarise and synthesise the learning from the project as a whole (Step A: "what is"), describe what you would like to do in a similar future project (Step B "what might or should be") and how you can make the change come true (Step C: "feedback designed to reduce the gap"). We will also have a look at the reflections from previous iterations (sprints) to see if your chain of reflection is complete.

The report shall not be longer than 5 pages. Refer as often as possible to examples taken from your project development (e.g., describe when you faced a challenge and how you solved it using techniques you learned in this course).

Points0

Submittinga text entry box or a file upload

File typespdf, txt, and md

Due	For	Available from	Until
2 Jun at 17:00	Everyone	-	-

- Unlike the sprint reports, here you are asked to summarise and synthesise what you learned throughout this course and your project.
 - Step A: Learning from the course and project as a whole
 - Step B: Describe what you would like to do in a similar future project (or when working in an agile team in a company).
 - Step C: How can you achieve this?
- Refer to examples from your project work and experience in your team.
- The report shall not be longer than 5 pages.

Peer Assessment

Peer Assessment

✓ Published Edit ⋮

Go to: <https://forms.office.co> and fill out the peer-assessment.

Points 0

Submitting Nothing

Due	For	Available from	Until
2 Jun at 17:00	Everyone	26 May at 0:00	2 Jun at 23:59

+ Rubric

- Finally, you will have to fill out a peer assessment.
- The background is that we need to check that everyone in the team was involved and did not “catch a free ride” with one of the teams.
- If you encounter problems in your team that you cannot solve yourself, please contact us ASAP (your TA, or either Jonas or Hans-Martin).
 - Don't wait too long to solve problems in your teams.
